WHY INVEST IN SPECIAL SITUATIONS PORTFOLIO?

What is early stage investing?

- Investing in companies with improving business prospects resulting in a visible change in operating parameters but not yet fully reflected in the company's P&L and balance sheet.
- Improvement in the business is expected to result in sizable improvement in P&L and the scale of the business.

Why should one look at early stage investing?

- It gives an opportunity to buy with margin of safety.
- There is opportunity to benefit from high earnings growth and PE/PB rerating.
- A differentiated strategy leading to low overlap with other main line products.
- Longer time horizon and hence low churn in the portfolio.
- Investing in small and midcap companies having the potential to eventually become large cap companies.

Why is the portfolio Mid & Small Cap?

- The impact of change in business is higher in mid & small cap companies than in large companies.
- Large universe of companies in mid & small cap which are less tracked and hence changes can remain unnoticed for long time.

INTRODUCTION TO SPECIAL SITUATIONS PORTFOLIO

The aim is to invest in a business with improving prospects resulting in a visible change in operating parameters but not yet fully reflected in the company's P&L and balance sheet.

Visible Improvement in Prospects*

- 1 *Impact of change in regulations*
- 2 *Corporate restructuring or change in the management*
- 3 *Competitors leaving the industry or in very weak position*
- 4 *Company having won new business or customers*
- 5 *Company entering new product & geographical markets*

**A few example from the whole set of situations*

FOCUSED ON

OPERATING PARAMETERS TO OBSERVE

Improvement in the business is expected to result in sizable improvement in P&L & scale of the business.

Increasing order book

*Demand supply situation
is improving for the
industry*

*Debt and interest cost
reducing*

*Capacity utilization is
increasing*

*Increasing geographical
presence*

*Increasing basket of
products introduced*

*Increasing proportion of
aftermarket business*

*New product approvals
and new client addition*

*New sales and collections
increasing YoY*

*Change in the sales mix
for the company*

FOCUSED ON

DISCUSSION ON A THEME – ELECTRICITY GROWTH WITH DISRUPTION (1/2)

- Demand for electricity is expected to increase with new demand coming from automobiles, increased penetration of white goods, electrification of railways and automation of factories.
- The disruption will be with renewables playing a much bigger part on the generation side.

Global spending on electricity generation & capacity addition

Future Renewable Investment Trends: 2017-2040

Global Average Annual Net Energy Capacity Additions

Source: World Energy Outlook 2017

India growth in demand and generation capacity

Computations of targeted capacity addition by FY2030 based on COP-26 targets (MW)

	2021		2030		Growth	
	Actual	Base	Target	Base	Target	
Demand (MU)	1,280,170	2,127,827	2,127,827	6	6	
Capacity (MW)						
Hydro	46,209	60,485	60,485			
Coal	209,295	225,075	225,075	1	1	
Gas	24,924	24,924	24,924			
Diesel	510	510	510

Gross Generation	1,328,513	2,176,977	2,176,977			
Coal PLF (%)	51.79	68	49	3	(1)	

Source: CEA, Kotak Institutional Equities estimates

DISCUSSION ON A THEME – ELECTRICITY GROWTH WITH DISRUPTION (2/2)

Increased spending on renewable energy and demand is expected to lead to higher spending on transmission and distribution for three reasons:

- ❖ Renewable power is a fluctuating form of energy, with lower PLF's (Plant Load Factor) and hence it will require back up sources of energy leading to multiple sources of power (distributed generation),
- ❖ Secondly historically power plants have been near the source of coal or fuel but renewables are not at the same locations and are at different remote locations,
- ❖ As demand will increase more power will need to be carried per line leading to higher spending on transformers and conductors.

The electricity generation will also become more distributed and the capital goods requirement will move from large BTG (Boiler, turbine and generators) to smaller BTG leading to faster growth in smaller rating capital goods.

CURRENT THEMES (1/2)

CURRENT THEMES (2/2)

Consolidation in and revival of NBFC space

Last few years have been tough for NBFC's & many weaker players have left the business or are not able to grow

NBFC

Corporate debt restructuring

With CIRP guidelines getting implemented many loss-making entities will change hands and go to more professional organisations

Improving outlook for the shipping industry

The demand supply situations in dry, bulk, tankers and off-shore vessels is in favor of ship owners. The situation is likely to continue as the order book is low

Portfolio Themes

Revival in travel and tourism

Post Covid the travel and tourism industry is likely to grow fast and few remaining players will grow faster

PORTFOLIO CONSTRUCTION

Portfolio Construction

The portfolio is constructed on the following basis

- a) 15 to 20 stocks in the portfolio
- b) Maximum of 35% in a single theme
- c) Minimum 80% portfolio will be constructed over 8-10 weeks, unless market provides an opportunity
- d) Weightage in a stock will depend on the valuation and earnings growth expected over next 3 years in a company
- e) Maximum weight in a stock 10% at the time of investment
- f) Cash is residual

RISK MANAGEMENT & EXIT STRATEGY

Risk Management Strategy

- Companies which have a listed history of at least 10 years
- Company should have Debt Equity ratio less than 0.5 (except for financials)
- The Long-Term credit rating of the company should be atleast BB
- Quarterly daily average value of minimum Rs. 25 Lakh (80% of the portfolio companies should fulfil this criteria)
- Promoters should have more than 50% of free shares
- Company having stable business model
- Company should be less diversified

Exit Strategy

- If the assumption with which the stock was bought becomes invalid for some reason, or
- When the business environment or operating parameters which were leading to growth in the company are no longer existing
- Stock price in our judgment is become unsustainably high
- We find a superior investment opportunity.
